Hands-on seminar Series 2026

Real-time quantitative PCR

参加費
無料

Using **QuantStudio 3** real-time PCR system, participants will analyze a gene expression level between two samples

- ◆ This course will provide hands-on training in quantitative PCR using the relative-standard curve method.
- ◆ By mastering this method, participants will also be able to transition to the $\Delta\Delta C_t$ method or others.

Date: **October 21** (Wed.) and **22** (Thu.) (two-day course)

9:30~15:30 on both days (Lunch break 12:00-13:30)

Place: Division of Genomics Research (Genome Center)
Seminar room #206 (second floor)

Eligibility: Undergraduate and graduate students, laboratory technicians, researchers, and university faculties.

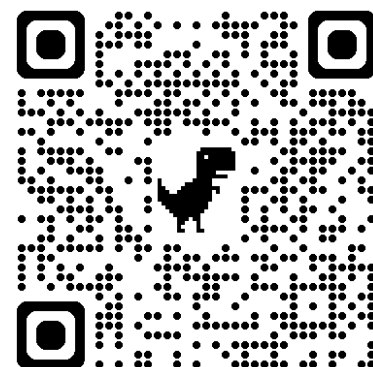

Registration: Please apply from our web site below.
